Once assembled these fans can be used to aid non-verbal communication. They are intended for use by an adult or a child as a way of asking a question (*“Are you hungry?”*) or making a statement (*“I am hungry.”*).

N.B. In teaching a child how to use these cards, it would be beneficial to initially show them real life objects that correspond to the pictures. For example, holding up the ‘Thirsty’ card while pointing at their drink cup to reinforce the link in their minds.

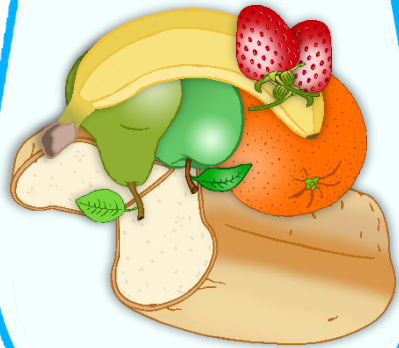

To create fan, cut and laminate each picture. Then join through the highlighted dot using a split pin or a treasury tag.
