

Observation Sheet

This observation sheet is intended to help practitioners concentrate on the most important aspects of what they are seeing during an observation and then develop steps forward for a child without being bogged down in extensive note-taking.

The sections of the sheet are designed for quick and concise notes that spark ideas for a child's development.

We hope it helps!

Observation Sheet

Child's name: Age in months:

Brief activity description

Mark-making with a friend on the art table.

What are they doing well?

Great sharing of pencils - collected a colour for a friend.

What about the activity are they finding difficult?

Controlling the pencil.

What is the specific skill that could be developed or consolidated to help them in this activity?

Fine motor control.

Ideas to help develop this specific skill:

Build hand strength with a tweezer activity.
Sheet with lines to follow with a crayon.
